

HPE OneView Global Dashboard REST API

Pramod Sareddy - Fullstack Developer

May 22nd 2019

#letshackshack

Leveraging the power of HPE OneView for large, mixed, and distributed environments

- Simplifies the management of multiple HPE platforms**
- Tracks the health and status of each server**
- Alerts administrators to any data center issues in real time**
- Gathers critical information for every server from each appliance**

What about collating data from multiple HPE OneView instances?

- Need a single tool that connects multiple platforms, worldwide**
- That can check and report on the status of all infrastructure**
- That enables real-time issue resolution in any data center**
- And delivers relevant information to the right people automatically**

HPE OneView

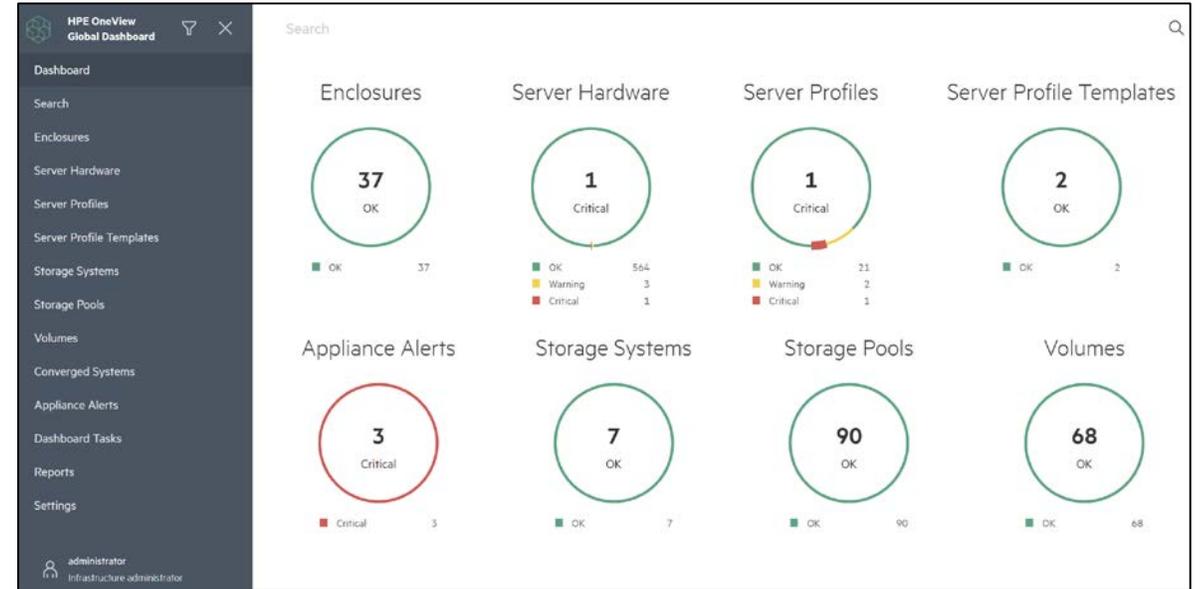

HPE OneView Global Dashboard

Unify management with HPE OneView Global Dashboard

Supporting up to 75 appliances and thousands of systems

- Provide unified view of health and alerting of resources managed by HPE OneView including HPE Synergy, C-Class, DL, ML, Apollo, HC380, and SimpliVity
- Instant search results for devices of interest
- In-context launch to HPE OneView, iLO and OA with single sign-on
- **NEW** Flexible access to health and inventory data with HPE Global Dashboard API
- Delivered as a virtual appliance at no extra cost
- Supports HPE OneView 3.1, 4.0 and 4.1
- Integrated reporting

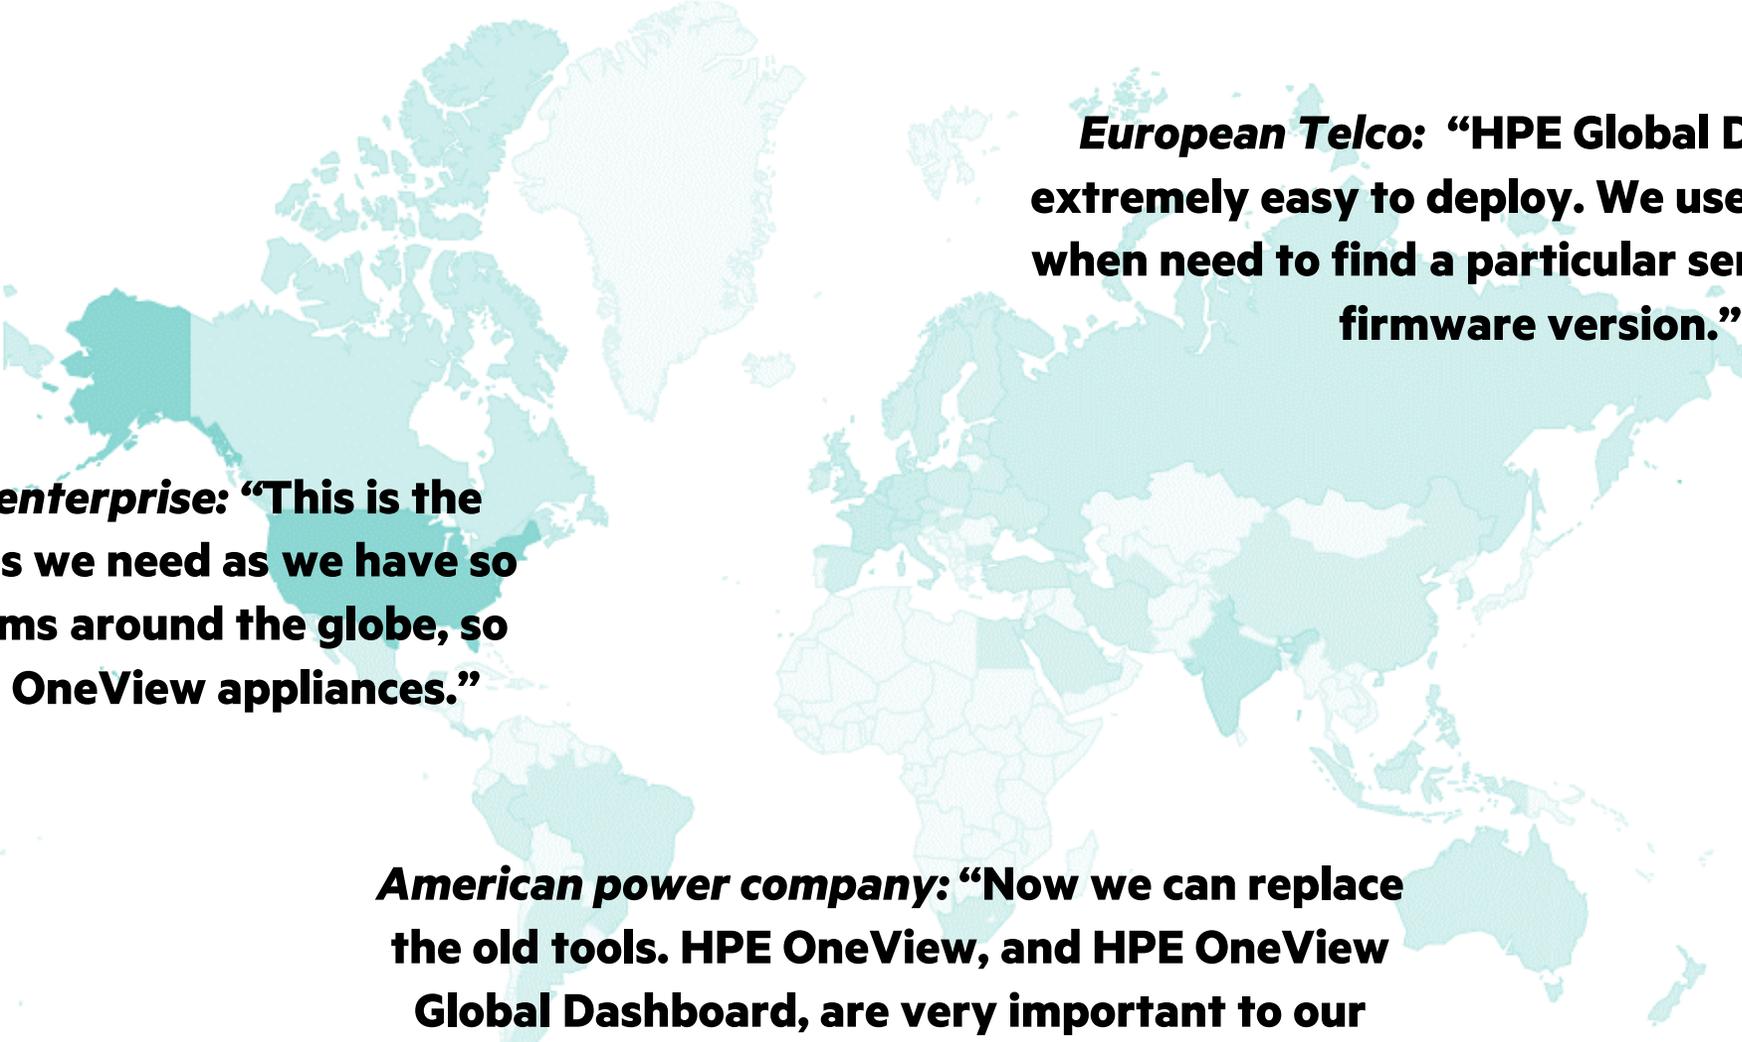

HPE DEV 3

HPE OneView Global Dashboard around the globe!

– Over 1,750 customers are using HPE OneView Global Dashboard

American enterprise: “This is the pane of glass we need as we have so many systems around the globe, so many HPE OneView appliances.”

European Telco: “HPE Global Dashboard is extremely easy to deploy. We use it extensively when need to find a particular server or check a firmware version.”

American power company: “Now we can replace the old tools. HPE OneView, and HPE OneView Global Dashboard, are very important to our efforts.”

HPE OneView Global Dashboard REST API (v2)

Download OpenAPI specification: [Download](#)

Product version 1.70.00

Appliances

Operations on appliances

Add appliance

Add a new appliance into Global Dashboard.

The table below gives an overview of the process for adding an appliance.

Description	Method	Path
Get certificates from remote appliance	GET	/rest/certificates/https/remote/{address}
Store certificates	POST	/rest/certificates/servers
Add appliance	POST	/rest/appliances

PARAMETERS

Header Parameters ?

Auth string Required
 Session authorization token obtained from logging in. The logged in user must have the role **Infrastructure administrator**. If this header is not included or if the session-token is invalid, the response code will be 401 Unauthorized. If the user does not have

POST /rest/appliances

REQUEST SAMPLES

```
{
  "address": "192.168.0.1",
  "applianceName": "appliance1",
  "category": "appliances",
  "loginDomain": "local",
  "password": "secret",
  "username": "sarah"
}
```

RESPONSE SAMPLES

- 202 Accepted
- 400 Bad request
- 401 Unauthorized
- 403 Forbidden
- 412 Precondition failed

Follow along lab 2

Exploring the REST API with Postman

Step 1

- Install Postman from [here](#) or ask lab assistant for USB key
- Read [this blog](#) for more details

Step 2

- Load Postman Collection from [here](#) or ask lab assistant for USB key

Using HPE OneView Global Dashboard with PowerShell

- PowerShell is standard with Windows
 - Simple syntax: VERB-NOUN or ACTION-ResourceName
- New PowerShell Core also available for Linux, MacOS
- PowerShell allows to extend the language by importing custom modules
 - Adds more CmdLets
- Many modules are available
 - Microsoft PowerShell Gallery at <https://www.powershellgallery.com/>
- HPE is shipping several modules: OneView, iLO, Storage, ...
- We have one module for HPE OneView Global Dashboard
 - Github (<https://github.com/rumart/GlobalDashboardPS>)
 - PowerShell Gallery (<https://www.powershellgallery.com/packages/GlobalDashboardPS/0.9.0>)
- And related blog on: <https://developer.hpe.com/blog/8nOPjXylpmC5rDBjywWZ/creating-a-powershell-module-as-a-wrapper-for-the-hpe-global-dashboard-r>

Follow along Lab 3

Using HPE OneView Global Dashboard with PowerShell

Step 1 PowerShell on Windows

- Open PowerShell console (admin)
- Run commands
 - **set-executionpolicy unrestricted** (optional: to enable execution of all commands/script in PowerShell)
 - **install-module -Name GlobalDashboardPS** (to install GlobalDashboardPS from PowerShell Gallery)
 - Press Y if prompted
- Close PowerShell console (admin)

```
Administrator: Windows PowerShell
PS C:\Users\sareddyp>
PS C:\Users\sareddyp>
PS C:\Users\sareddyp> Install-Module -Name GlobalDashboardPS

Untrusted repository
You are installing the modules from an untrusted repository. If you trust this repository, change its
InstallationPolicy value by running the Set-PSRepository cmdlet. Are you sure you want to install the modules from
'PSGallery'?
[Y] Yes [A] Yes to All [N] No [L] No to All [S] Suspend [?] Help (default is "N"): y
PS C:\Users\sareddyp>
```

Step 1 PowerShell Core on MacOS

- install PowerShell using brew
brew cask install powershell
- or install from following package
<https://github.com/PowerShell/PowerShell/releases/download/v6.1.2/powershell-6.1.2-osx-x64.pkg>
- Start PowerShell
pwsh
- Install HPE OneView Global Dashboard Module
install-module GlobalDashboardPS(to install
GlobalDashboardPS from PowerShell Gallery)
Press Y if prompted

PS /Users/lalli> brew cask install powershell

==> Satisfying dependencies

ops.hpeonesphere.net:1443
All Formula dependencies satisfied.

==> Downloading https://github.com/PowerShell/PowerShell/releases/download/v6.1.2/powershell-6.1.2-osx-x64.pkg

==> Downloading from https://github-production-release-asset-2e65be.s3.amazonaws.com/49609581/4d859480-1824-11e9-8335-07226f256af67X-Amz-Algorithm=AWS4-HMAC-SHA256&X-Amz-Credential=AKIATMNJYAX4CSVEHS3A9Z2F2019021292Fus

100.0%

==> Verifying SHA-256 checksum for Cask 'powershell'.

==> Installing Cask powershell

==> Running installer for powershell; your password may be necessary.

==> Package installers may write to any location; options such as --appdir are ignored.

installer: Package name is PowerShell - 6.1.2 Sandboxes Customers Sandboxes

installer: Installing at base path /

installer: The install was successful.

🍷 powershell was successfully installed!

NAME  
    Connect-OVGD
```

```
SYNOPSIS  
    Create a connection to a Global Dashboard instance
```

```
----- EXAMPLE 1 -----
```

```
PS C:\>Connect-OVGD -Server 1.1.1.1 -UserName user01
```

```
Connects to the specified Global Dashboard instance with the specified user. The function will prompt for the password of the user
```

```
----- EXAMPLE 2 -----
```

```
PS C:\>Connect-OVGD -Server 1.1.1.1 -Credential (get-credential)
```

```
Connects to the specified Global Dashboard instance with a PS Credential
```

```
PS C:\Users\sareddyp>
```

Step 3

- ✓ **connect-OVGD -portal 77.158.163.131** (to login)
- ✓ **username: Administrator**
- ✓ **password: password**
- ✓ **Get-OVGDAppliance** (to get list of appliances)
- ✓ **Get-OVGDEnclosure** (to get list of projects)
- ✓ **Get-OVGDAppliance -Name ovc7k** (to get an appliance with matching name)
- ✓ **Get-OVGDServerHardware** (to get list of server hardware)

```
Administrator: Windows PowerShell
PS C:\Users\sareddyp>
PS C:\Users\sareddyp>

HPE Developer Program

HPE DEV

- developer.hpe.com
- Hackshacks
- Hackathons
- blog articles
- language bindings
- Engaging with developers
- Exposing our APIs to Partners and Customers

Follow along lab 4

Accessing the API Documentation on developer.hpe.com

Step 1

- Open browser to: **developer.hpe.com**
 - Select Platforms
 - Select HPE OneView Global Dashboard
 - Select API Reference on SwaggerHub

HPE OneView Global Dashboard

HPE OneView Global Dashboard allows you to manage up to 25 HPE OneView or HPE Synergy instances, and 150 HPE Hyper Converged 380 instances across data centers.

Unified View of Infrastructure Across Data Centers in Multiple Locations

The HPE OneView Global Dashboard provides a unified view of the health and inventory of Hewlett Packard Enterprise servers, profiles, enclosures, HPE Synergy frames and HPE 3PAR storage systems across multiple appliances for ease of management.

Supports multiple versions of OneView including: HPE OneView and HPE Synergy Composer including 3.1, 4.0, 4.1

Aggregates critical activities from multiple appliances into a single feed to quickly identify issues occurring on monitored hardware for prompt resolution.

Generates reports for monitored assets to view inventory, including firmware versions as well as compliance that allow you to verify that your equipment meets corporate standards.

One click navigation with single sign-on in context launch of managed resources.

→ [Learn more about Global Dashboard](#)

API Reference

Global Dashboard provides a public REST API to can be used to retrieve information about resources. For example, you can retrieve server-hardware information about thousands of servers from datacenters scattered across the global with a single API call.

Appliances Operations on appliances

POST /rest/appliances Add appliance

Add a new appliance into Global Dashboard.

The table below gives an overview of the process for adding an appliance.

Description	Method	Path
Get certificates from remote appliance	GET	/rest/certificates/https/remote/{address}
Store certificates	POST	/rest/certificates/servers
Add appliance	POST	/rest/appliances

Parameters

Name	Description
auth * required	Session authorization token obtained from logging in.
string (header)	If this header is not included or if the session-token is invalid, the response code will be 401 Unauthorized.

Thank You!
